HAIR REMOVAL (1/2)

Sugaring & Waxing

DRIFT TIP

Our service providers **will not be able** to provide hair removal treatments on any clients prescribed on Accutane (must be off for 1yr), blood thinners or any other medications alike.

Add-on's must be requested at time of booking and only available on certain body parts.

Soft wax is your go-to for hair removal on almost all areas of the body. It's a sticky paste that gets applied to your desired area, and removed by using a cloth/muslin strip. However, if you have extra coarse hair or sensitive skin, then **hard wax** may be your better option.

First time sugaring? Prior to your first appointment, you should **avoid** exfoliation and heavy sun exposure or tanning the day before, of and 24 hours after. Stop shaving **at least 10 days** or so before you come in for optimal results.

Our services are **gender neutral**. Prices are **estimated** by hair density and amount of product required as per discretion of our esthetician.

Eyebrows	25	Lower Leg	45
Eyebrows Maintenance (within 4 weeks)	20	Upper Leg	55
